Secuyou Smart Lock

User manual - MATTER version 1.0

March 2024

Pair the lock with MATTER

March 2024

Add lock
Step 1

• Press and hold the UNLOCK button for more than three seconds

GREEN LED flashes fast (2-3 times per second) and the RED LED flashes slow (1 time per second)

Bluetooth LE advertising is enabled for 15 minutes and makes the Secuyou Smart Lock discoverable for a Thread border router

The Secuyou Smart Lock is in the unprovisioned (unpaired) state and is waiting to be commissioned through a Thread-Border-Router

March 2024

UNLOCK button

Add lock
Step 2 (for iOS users)

• Go to the HOME app on your iOS device

1. Open the Home app and tap Add

2. Tap Add Accessory

3. Use the camera on your iPhone or iPad to scan the QR code on the box of the accessory (Secuyou Smart Lock). If you have an iPhone 7 or later and see on your accessory, hold your iPhone near the accessory to add it

   When the GREEN LED flashes rapidly (4 times per second), the Secuyou Lock is in the unprovisioned state and a commissioning process is started over Bluetooth LE

4. When your accessory appears, tap it. If asked to Add Accessory to Network, tap Allow

   During commissioning the LED's turn off

5. Assign a passcode and add your accessory to a room and name it to help you identify it in the Home app and control it with Siri
